## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 15, 2010 has been entered.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Independent claim 6 requires a ratio  $W_n/W_s$  between 0.3 and 1.5 inclusive AND the presence of notches that terminate well before reaching said associated radius of curvature portion. It is unclear how an arrangement having a ratio of 1.5, for example, can also satisfy the second structural limitation noted above. In particular, a ratio of 1.0 appears to define an arrangement in which the notches and the bent ends have the same width and such a width would extend to an intersection point with said associated radius of curvature portion. Thus, it appears that any ratio above 1.0 would define an arrangement in which the notches actually extended into said associated radius of

curvature. Additionally, the language "well before" does not provide a clear and concise understanding of the claimed invention. Applicant is asked to clarify the scope of the claimed invention without the introduction of new matter.

***Allowable Subject Matter***

4. Claims 1 and 3-5 are allowed. The following is a statement of reasons for the indication of allowable subject matter: as correctly argued by applicant (Pages 6-8), one of ordinary skill in the art at the time of the invention would not have found it obvious to modify the runflat tire assembly of Hellweg in accordance to the claimed invention. More particularly, the prior art references of record fail to suggest, disclose, or teach a runflat assembly comprising an annular shell and a pair of notched, elastic rings, wherein said rings have the claimed arrangement.
